EXPERIENCE

Senior Software Engineer

Novare Technologies, Inc.

May 2023 - Present, Taguig, NCR

CPMA (My Sun Life PH) - is a personal dashboard for policyholders to track fund values, pay premiums, update contact info, and file claims online. It provides customers with direct, 24/7 access to manage their own insurance and investment accounts.

SLGFI AHO Portal - is a secure, specialized platform for Sun Life Grepa financial advisors to manage client policies, submit new applications, and access business reports.

GlobeOne - is a digital platform designed for Globe prepaid, postpaid, and broadband customers to manage accounts, pay bills, buy promos, and redeem rewards in one place.

Bayad - serves as a one-stop-shop for multiple payment needs. It's particularly known for ease of use, widespread accessibility, and the immediate confirmation of transactions, making bill payments simpler and more efficient for consumers.

- Designs, develops, and maintains application solutions and software for customers based on specifications and requirements.
- Integrates, tests, and debugs application solutions and software when deployed in development and production environments.
- Performs code reviews to uphold code quality and ensure adherence to best practices.
- Documents the code, deployment steps, issue root causes, module or system design, entity relationships/models, and logical process flows implemented in code.
- Explores with new tools and technologies that will improve software fulfillment of current and new requirements.
- Provides technical guidance to other members of the project team as necessary.
- Collaborates with lead software engineers to improve software development processes.
- Provides application support by investigating incident tickets, performing data fixes, and implementing long-term solutions to prevent recurrence.

Applications Developer

TELUS International Philippines, Inc.

Jan 2022 - May 2023, Pasig, NCR

CASA - is used by the customer agent representatives of TELUS Canada to assist customers that have issues with their TELUS ISP / TELUS MOBILE plans and such.

Skills Matrix - is a self assessment to our skills as a team member based on soft and technical skills. It includes our self rating and your manager's rating, It also allows the team leader to identify skills gaps.

Career City - is a website where the team member can take an assessment that could generate roles based on team member's preferences on career interest.

- Deployed to a Canadian client as a full-stack developer.
- Refining business requirements and turning it into functional requirements that can be better understood by my co-developer.
- Responsible for the detailed design, documentation, development, unit testing and maintenance of applications.
- Analyze the issues being reported and be able to attend to it in a timely manner without impacting the quality of work.
- Demonstrated ability to identify problems and situations, take appropriate action, implement solutions or escalate as required.
- Demonstrated effective decision-making skills while under limited supervision.
- Provide guidance and support to mentees to help them develop professional and personal skills.

Software Developer

Premier Software Enterprise, Inc.

Mar 2021 - Aug 2021, Makati, NCR

PSE EASy - is an online system developed by the PSE to make investing in Initial Public Offerings (IPO)s more convenient. This is a new system for the previous IPO subscription process called the Local Small Investors Program (LSIP).

- Translate business analysis requirements into functional applications.
- Managed to design, build, and maintain efficient, reusable and reliable code that supports the functional specs of the project owner.
- Integrate data storage solutions that will help users organize their data better and have improved the software application experience.
- Ensure the best possible performance, quality, and responsiveness of application to prevent bad experience.
- Managed to identify bottlenecks and bugs, and devise solutions to mitigate and address these issues.
- Managed to prepare reports, manuals and other documentations on the status, operation and maintenance of software.
- Performed other functions like documentation, testing, and support that were assigned by Development and Operations Head from time to time.

Software Developer Intern

Northeast Business Solutions

Feb 2020 - Jun 2020, Norzagaray, Bulacan

- Managed software modification and providing support and maintenance upon client requests.
- Handled system testing and validation procedures.
